

# Integrated Platform for Understanding Physical Prior & Task Learning

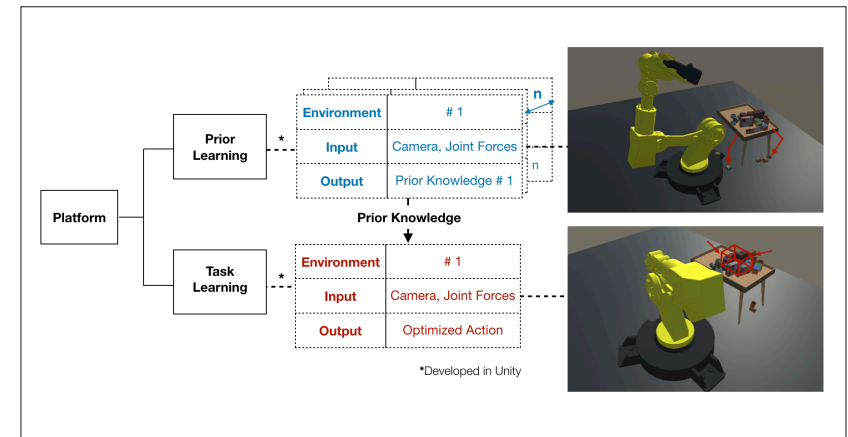

Namrata Sharma

Biomedical Engineering, University of Waterloo, Canada

Chang Hwa Lee and Sang Wan Lee

Bio and Brain Engineering, KAIST, Republic of Korea

- A platform that bridges task independent knowledge with new task learning environments
- A trainable prior knowledge module that collects environmental prior data efficiently
- The task learning module that successfully learns specific target tasks, improvable with integration of prior knowledge module

The platform pipeline with the prior and task learner.
